

COVID-19 PROTOCOL

For in-person sessions, we ask that you take all these precautions

Keep your hands Clean

The CDC recommends to wash your hands often with soap and warm water for at least 20 seconds. If not readily available, use hand sanitizer that contains 60% alcohol.

Avoid close contact

Avoid close contact with everyone, specially if they are at higher risk of getting sick. Try to stay 6 feet apart.

Clean and Disinfect

Clean and disinfect frequently; specially the manipulatives and testing tools (Patients personal toys should be used primarily).

Cover coughs and sneezes

Cover your mouth and nose with a tissue or use the inside of your elbow. Immediately wash/sanitize your hands.

Wear a facemask

Wear a mask when around others and before entering patients home.

Stay home if you're sick

Stay home if you are feeling unwell. Get medical care, if needed.

Prior to Sessions:

Please contact Fox Health if anyone in your household has been sick in the last 2 weeks. We will reschedule your session when everything is safe to continue.

Ask where caregivers would feel most comfortable providing services (porch, outdoors, indoors, etc.).

Please call the patient's caregiver when you arrive and wait in the car until they ask you to come inside.

Allow yourself ample time in between sessions for self-care.
